DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 16-29 are rejected under 35 U.S.C. 102(a) as being anticipated by Potard et al (hereafter Potard) ("Study of Sound Source Shape and Wideness in Virtual and Real Auditory Displays").

Regarding claims 16, 18-21 and 28, Potard discloses a method and an apparatus for coding a presentation description of audio signals, comprising:

generating a parametric description of a sound source (under AudioBIFS);

linking the parametric description of said sound source with the audio signal of said sound source (sect. 2);

describing the widenness of a non-point sound source by means of said parametric description, wherein a shape approximating said non-point sound source is defined (sect. 2.3); and

assigning one of several decorrelations to said non-point sound source in order to allow the usage of the same audio signal for more than one non-point sound source (sect. 1.2).

Regarding claim 17, although not specifically discussed, the first and second nodes are inherently included in MPEG-4 coding and decoding as discussed in Potard.

Regarding claims 22-27 and 29, the method and apparatus of decoding is performed in Potard.
